Decking

"Growing Redwoods for the Future"

Among our four yards, we carry a complete line of the finest decking material available. Of course, we feature redwood decking from our own mill in Davenport. 2x6 Redwood Construction Heart is \$1.58 / lin. foot. Redwood decking is timeless, classic, and the perfect material for our central coast area.

But, for those looking for something different...more colors and new textures, you'll be amazed with the choices of Composite Decking we carry. Composites are low maintenance, durable products for decks, trims, and fascias. Each yard specializes in a different brand, which gives you more variety. Non-stock items may be special ordered easily.

Composite options include EVERGRAIN, WEATHER BEST, and TREX. And, there's still another option: Ipe' hardwood decking.

More decks...more choices! See them in our Fall Catalog.

Redwood Siding Many homes are constructed with redwood siding. Big Creek stocks a wide selection of these products already run to patterns that may closely match the siding on your home. So, if you're doing some remodeling, you're going to save big money on these products.

Trim and Fascia We offer three products for trim and fascias. REAL TRIM (from Blue Linx) is a factory-primed exterior product with a beautiful, tight-grained substrate that can handle all that Mother Nature dishes out.

TRU-GRAIN (from California Cascade) is made from kiln-dried boards to reduce cupping. It has a deep wood-grain texture that holds when painted.

ADVANTAGE (from Kelleher) has both an oil-based coating and a latex base top surface coating.

Moulding Kelleher Corporation makes pine and MDF mouldings for many different applications. All they usually require is one coat of paint. We have dozens of sizes, shapes, and profiles.

Roofing Materials It's been a great summer, but you know what comes next...rain! Be prepared by stopping at Big Creek for composition roofing in six colors, cedar shingles, roll roofing and roof coatings.

Erosion Control Get ready for winter with erosion control and landscape products. We've got everything you'll need for retaining walls and drainage.

Sheetrock and Insulation

We have everything you need for a repair or a remodel. Sheetrock, Durock, Insulation, and a new product: 3x5' - 1/4" Fiberock.

Paint and Primers

Our newly designed paint department in Watsonville features state-of-the-art tinting and the professional grade Devoc paint line.
